Workshop Agenda

Katharina Spurling-Kaffl will be continuing with Slim's workshops in partnership with competent facilitators trained by Slim. In addition to these facilitators, we will closely examine and use the videos Slim made as a learning tool to explain parts of his work.

These classes will have three (3) main components:

- 1) You will be given theoretical information on Geopathic stress zones; learn Slim Spurling's dowsing technique for finding these Geopathic stress zones and study the different ways of blocking them. The group will, then, go out in the field and practice these methods.
- 2) Demonstrations will be presented on how to use the Light-Life Tools for healing. This will be followed by closely supervised hands-on practice. We will use this great opportunity to explore and experience all the Light-Life Tools; the standard tools as well as some of the latest tools.
- 3) You will, also, be taught how to use the Light-Life Tools for healing, agricultural applications and for cleaning/clearing the environment.
